

# Invest in Organization with Dream Closets

Do you need a fancy, closet organizing system? Will it add value to your home? If it's behind closed doors, why does it need to look good anyway? These are all valid questions when considering a major upgrade to your home such as a closet organizing system. As Hawaii's authorized dealer for ClosetMaid systems, **Dream Closets LLC** owner Malia Gurney can help you find the answers to these and other questions about organizing your life. She explains, "If you and your spouse simply don't have room in your bedroom closet for both wardrobes, it's time to take action. If one spouse's clothes have been relegated to a guest room closet, or you just can't find what you want to wear (while your spouse is still sleeping) without rattling around in the closet, installing a customized laminate closet system from Dream Closets may keep the peace in your marriage."

Your home is as unique as you are, so Malia and her staff work closely with each client, creating custom-made efficient storage solutions. "We first review all your current possessions,"

*Dream Closets can organize any room in your home.*

Malia notes. "Next, we design an array of shelves, poles, drawers, baskets and other accoutrements to ensure your new closet will stay organized once it is installed."

Not just for bedroom closets, Dream Closets also can create a storage system for your garage, kitchen, or home office.

But what about the cost? It's not as expensive as you may think, says Malia. "In many cases a customized laminate closet system costs less than bedroom furniture and provides you twice the amount of storage space while not compromising your living space," she says. Custom laminate closets come in an array of price ranges, styles and colors to meet your monetary and decorating needs. Plus, most closet makeovers can be completed in a few hours. Call Malia for a free estimate.
